Who We Are

About Us

At Berkley we approach Risk differently. We integrate Risk Management into your insurance policy by combining traditional insurance and risk management practices with technology. Providing real-time monitoring, asset management and recovery.

Because we manage your risk better, you can reduce claims and reverse unfavorable loss trends. This enables us to secure better premiums across your portfolio.

We build risk models with our Clients and formulate take to market strategies. We focus on how we can add value through insurance and innovative asset finance structures.

BERKLEY RISK (PTY) LTD

368 Oak Avenue, Ferndale, Randburg, Gauteng, 1709

BERKLEY RISK
THE RISK MANAGEMENT
PRACTICE

What makes Berkley Risk different?

Managing risk through technology.

Berkley Risk is the only Insurance Brokerage with an in-house IoT capability.

This enables you to monitor, track, locate and manage your fixed and movable assets through our app on your mobile device.

Our low-cost, locally manufactured IoT devices enable you to track and self-recover your equipment in the field, monitor infrastructure and geo-fence movable property.

Risk Consulting Services

We provides risk and consultancy services to identify and mitigate safety, security and resilience risks in order to: (i) ensure compliance, (ii) reduce losses and (iii) enhance physical & digital system integrity.

“We anticipate risk through experience and analytics so that our Clients can focus on business. Our collaborative approach helps you succeed.”

Asset Tracking and Monitoring

Our People and Asset Location platform enables devices to simply connect to the largest non-GSM network in South Africa and communicate using IoT Messaging. We also offer closed system solutions for specific sites.

Reinsurance Broking Services

Our reinsurance consultants understand that for an Insurer to underwrite risk profitably, they will always need reinsurance to preserve or enhance their capital strength and ratings.

We design structures which optimise the client’s reinsurance purchase; providing total clarity on the risk vs reward benefits.

Preferred risk advisor to the Cannabis industry.

- We understand the unique nature of the physical risks: controlled growing environments, processing, storage, transit and high security and site surveillance.
- Our cover addresses the living plant material stages, manufacturing process, machinery breakdown, contamination, filtration and climate control.
- We have unrivalled understanding of liability risk exposures, dispensing and packaging for local, European and North America markets.

Our Products and Services

- Insurance Broking Services – Locally and Regionally (across sub-Saharan Africa)
- Risk Management services and strategies to reduce and minimise risk to acceptable levels.
- Alternative Risk Transfer and retention structures.
